Call for Papers
ICBIR2022
Interdisciplinary Research Conference

The 7th International Conference on Business and Industrial Research (ICBIR2022) is a multidisciplinary academic conference which includes research in science, engineering, informatics, modern business, social science and linguistics since 2010. ICBIR2022 will provide opportunities for the Researchers, Academicians, Industry persons and students to interact and exchange ideas, experience and expertise in the current trend and upcoming technologies. Besides this, participants will have the opportunity to meet people with similar research interests which can lead to future research cooperation. The need for a multidisciplinary conference is to make transdisciplinary collaboration among researchers from around the globe. The areas of research covered by ICBIR are the most disruptive technologies currently undergoing a massive transformation. This conference is planned as the offline conference to be conducted in the second quarter of 2022. This plan is tentative as Bangkok is opening for fully vaccinated foreigners to visit by the end of 2021. Special sessions are also open for academicians and researchers to collaborate with like-minded researchers to bring a theme under one umbrella and proposals are invited for the same. Accepted papers will be submitted for inclusion into IEEE Xplore subject to meeting IEEE Xplore’s scope and quality requirements. Sightseeing opportunities also will be provided to participants. Registration benefits are available for IEEE members, AIAT members and partner universities’ faculty and students.

RESEARCH TOPICS (General Sessions)

Track 2: Information and Communication Technology: Digital and Multimedia Technology, Computer Networks Performance, Networks and Cyber Security, Data Science and Analytics, Business Intelligence and Technology, Web Technology and Mobile Applications, AI and IoT, Natural Language Processing, Other related topics.

RESEARCH TOPICS (Special Session)

Language Processing in Data Analytics Era

Deadline of Paper Submission: January 31, 2022
Notification of Acceptance: March 15, 2022
Deadline of Camera Ready: March 15 – April 30, 2022
Early Bird Registration: April 10, 2022
Regular Registration: April 11 – May 10, 2022
Conference Date: May 19 – 20, 2022

ICBIR2022
Special Session on Language Processing in Data Analytics Era

The 7th International Conference on Business and Industrial Research (ICBIR2022) is a multidisciplinary academic conference which includes research in science, engineering, informatics, modern business, social science and linguistics since 2010. ICBIR2022 will provide opportunities for the Researchers, Academicians, Industry persons and students to interact and exchange ideas, experience and expertise in the current trend and upcoming technologies. Besides this, participants will have the opportunity to meet people with similar research interests which can lead to future research cooperation. The need for a multidisciplinary conference is to make transdisciplinary collaboration among researchers from around the globe. The areas of research covered by ICBIR are the most disruptive technologies currently undergoing a massive transformation. This conference is planned as the offline conference to be conducted in the second quarter of 2022. This plan is tentative as Bangkok is opening for fully vaccinated foreigners to visit by the end of 2021. Special sessions are also open for academicians and researchers to collaborate with like minded researchers to bring a theme under one umbrella and proposals are invited for the same. Accepted papers will be submitted for inclusion into IEEE Xplore subject to meeting IEEE Xplore’s scope and quality requirements. Sightseeing opportunities also will be provided to participants. Registration benefits are available for IEEE members, AIAT members and partner universities’ faculty and students.

Special Session : Language Processing in Data Analytics Era

Natural Language Processing (NLP) is a long-term challenge driving a human sophisticated recognition tasks in artificial intelligence, specialized in language representation, understanding, and generation, which are the critical elements in machine translation, question answering, summarization, to name a few. Thanks to the recent advancements in deep learning and data science research, many NLP applications have been realized with the unprecedented boost in performance, and well-accepted in the practical use enhancing by the instant outreach on the Internet and Internet of Things (IoT). NLP together with the data insight is magnifying human potentials to cope with the drastic change in the way of problem solving, and is growing interest in research of NLP and data science.

Aiming to cover state-of-the-art research on a variety of applications that take NLP, data science, machine learning and deep learning into account, both theoretical analysis and empirical solutions to real-world problems are welcome and/or encouraged.

Note:
- All the papers for this Special Session have to be submitted through submission system of ICBIR2022
- all questions concerning this Special Session, please send by e-mail to virachng@nu.ac.jp
- other general questions related to the ICBIR2022 conference, please send by e-mail directly to conference secretariat: icbir@tni.ac.th
